REASON FOR ALLOWANCE

1. The primary reason for allowance is that the prior art fails to teach the combination of a closed-looped conveyor inside of a housing, having thereon, a hanger for supporting the laundry items for circulating the same in a closed-loop of the housing. Further included, a suds applicator, a cleaning device, a pre-dehumidification, and/or a smoothing/pressing device (squeeze rollers). The prior art teaches a pass-through conveyor system, with hangers for supporting the laundry items, however, there is no teaching of a conveyor circulating the laundry in a closed-loop path inside a housing with pre-dehumidification. The prior art also teaches washing devices for hanging garments (i.e., Germany 19 28 923), however, in these arrangement there is no conveying structure/arrangement.
